

SKELLAGEN PLUS

400mg hydrolyzed collagen plus 100mg glucosamine sulfate The only marinebased collagen and glucosamine sulfate combination available in the Philippine market.

SKELLAGEN Plus

As people age, collagen and glucosamine deplete from the body causing musculoskeletal pains, vulnerability to sports injuries, slower recovery from post-surgery, and early appearance of skin wrinkles. Normally, the production of collagen in the body slows down at the age of 40, thus signs of aging starts at this stage of life.

SKELLAGEN Plus is recommended for:

- > joint pains like arthritis of the knee, hip, shoulder and back
- > sports injuries like sprains, tendinitis, ligaments, tendon and muscle tears
- > facilitates early recovery from slipped disc
- > supports faster healing for bone fractures and post-operative procedures
- > maintain healthy and younger skin

Direction:

Take 1 capsule daily or as prescribed by your physician

Precaution:

Contraindicated for pregnant and breastfeeding mothers.

Frequently asked questions:

Why do we need to take collagen and glucosamine?

The amount of collagen in our body decreases as we age. Collagen levels decrease by the age of 40, and is depleted faster than it is produced. By the age of 60, over half of the body's collagen has been depleted. Glucosamine sulfate can improve pain and movement in knees affected by osteoarthritis and may keep the joint problems from getting worse because it supplements the synovial fluid which lubricates the joints.

What is the difference between Skellagen Plus and other collagen products?

- Skellagen Plus has glucosamine which is necessary to produce more synovial fluid.
- Skellagen Plus comes from the scales, skin, fins and bone of saltwater fish. Fish collagen peptides are known to have better absorption and bioavailability due to their smaller particle sizes compared to other animal collagens. It is absorbed up to 1.5 times more efficiently into the body and has superior bioavailability over bovine or porcine collagen.
- It has type 1 and 2 collagen, which is the most abundant collagen in the human body. It is best known for providing the foundation for beautiful skin, strong connective tissues and sturdy bones.

Are there any side effects from taking Skellagen Plus?

• There had been no known side effects to the kidney, liver, and other organs even for a longer period of time because it is of marine origin like skin, scales, and bones of freshwater and saltwater fish.

Are there any contraindications to other anti-hypertensive, anti-diabetic, anti-cholesterol, or antibiotic medications?

 No, there are no contraindications because it is not a drug that may interact with other medications in the body. It is a food supplement coming from marine source.
